Partnerships for Advancing SDG 3: Good Health and Well-being

Internal University Collaboration

National Health Promotion and Well-being Initiatives in 2025

In 2025, Thaksin University placed significant emphasis on promoting public health and well-being by integrating its core missions of education, research, academic services, and collaboration with government agencies and healthcare networks. These efforts aimed to support the development of an effective national healthcare system that responds appropriately to the needs of the population.

The University's initiatives encompassed healthcare workforce development, health promotion and disease prevention, healthcare service improvement, and the generation of knowledge and innovations that can be applied to sustainably enhance people's quality of life. The key initiatives are outlined below.

Establishment of TSU Primary Care: Strengthening Community Healthcare Services

On 27 May 2025, Thaksin University officially opened the TSU Primary Care Center at its Songkhla Campus in collaboration with Songkhla Hospital, the National Health Security Office (NHSO), Region 12, and Khao Rup Chang Municipality.

The center was established to provide accessible primary healthcare services to university students, staff, and surrounding communities under Thailand's Universal Coverage Scheme.

Its services encompass health promotion, disease prevention, medical treatment, and rehabilitation. The center also supports an integrated healthcare delivery system through patient referral services and telemedicine, facilitating continuity of care and improving access to healthcare services.

This collaborative initiative reflects Thaksin University's commitment to strengthening community-based healthcare services and supporting Thailand's public health system through partnerships between higher education institutions, healthcare providers, and local government authorities.

The initiative contributes to SDG 3 (Good Health and Well-being), particularly Target 3.8 on universal health coverage, and SDG 17 (Partnerships for the Goals) through institutional collaboration in healthcare service delivery.

Promoting Student Mental Health and Psychological Well-being

Thaksin University also placed significant emphasis on promoting students' mental health and psychological well-being through various activities aimed at strengthening emotional resilience and mental health awareness. On 10 January 2025, the University, in collaboration with Mental Health Center 12 under the Department of Mental Health, organized a mental health capacity-building activity at its Songkhla Campus. The activity focused on developing students' psychological well-being and emotional resilience through training in active listening, self-awareness, and emotional empowerment.

Furthermore, on 1 August 2025, the University organized the "Spa Jai" (Mental Wellness Spa) project at its Phatthalung Campus. The initiative provided a supportive environment for emotional healing and psychological well-being among students and the general public, particularly individuals affected by domestic violence, social violence, or natural disasters. Activities included therapeutic yoga, emotional self-care, and mindfulness-based practices designed to promote psychological recovery and inner resilience.

Strengthening Disaster Nursing Preparedness and Emergency Response Skills

Thaksin University also organized simulation-based disaster nursing training for students to strengthen their preparedness and practical competencies in emergency and disaster situations.

The training emphasized patient triage, critical decision-making during emergencies, and effective coordination of emergency responses. It also covered disaster management across three key phases: preparedness before disasters, emergency response during disasters, and recovery and rehabilitation after disasters

These activities aimed to enhance students' practical skills and readiness to respond effectively to public health emergencies and disasters.

Promoting Disease Prevention through Hepatitis B and C Screening

As part of its preventive healthcare initiatives, Thaksin University, through its Medical Technology Program, organized free hepatitis B and C screening services for university students and staff at the Elderly Health Promotion Center, Faculty of Nursing.

The screening initiative aimed to promote early detection, increase awareness of hepatitis B and C infections, and encourage preventive healthcare practices. By providing accessible screening services, the University sought to improve health awareness and reduce the risks associated with undetected viral hepatitis infections.

These initiatives reflect Thaksin University's commitment to promoting health and well-being through mental health support, disaster preparedness, and disease prevention, contributing to SDG 3 (Good Health and Well being) and strengthening collaboration with public health organizations in support of SDG 17 (Partnerships for the Goals).

Enhancing Staff Health and Well-being through Healthcare Partnerships

Thaksin University recognizes the importance of improving healthcare benefits and promoting the health and well-being of its staff. On 14 November 2025, Thaksin University, Songkhla Campus, signed a Memorandum of Understanding (MOU) with Bangkok Hospital Hat Yai to strengthen healthcare services and enhance staff welfare. The collaboration covers annual health check-ups, vaccination services, medical treatment under applicable healthcare entitlements, and medical consultations through telemedicine.

This partnership reflects the University's commitment to promoting staff health and well-being by improving access to healthcare services and strengthening collaboration with healthcare providers, in alignment with SDG 3 (Good Health and Well-being) and SDG 17 (Partnerships for the Goals).

4. Community and Local Partnerships

Community Support for Bedridden Patients and Older Adults

On 10 and 12 March 2025, Thaksin University's Phatthalung Campus, in collaboration with the Faculty of Nursing, conducted home visits to bedridden patients and individuals requiring assistance with daily living in Ban Phrao Subdistrict, Phatthalung Province.

The activities included basic health assessments, guidance for family members and caregivers, and the distribution of essential supplies to patients and their families. These efforts aimed to improve the quality of life of vulnerable individuals and strengthen community-based care.

Community Health Outreach and Education

On 22 May 2025, the Faculty of Health and Sports Science and the Faculty of Nursing collaborated with the Princess Mother's Medical Volunteer Foundation (PMMV) to provide health services and educational activities at Ban Khuan Tabaek Border Patrol Police School in Phatthalung Province.

The activities included home visits, nutritional guidance, dementia screening, physical fitness assessments, and physical and mental health consultations. The initiative focused on early identification of health risks, preventive care, and improving health literacy among local residents.

Together, these initiatives demonstrate Thaksin University's commitment to supporting vulnerable populations and strengthening community well-being through institutional and local partnerships, contributing to SDG 3 (Good Health and Well-being) and SDG 17 (Partnerships for the Goals).Evidence: https://sdg.tsu.ac.th/detail.php?aNum=20250702143247&id_list=1016

In addition, the Faculty of Allied Health Sciences organized the “Physical Therapy Near You” activity at the TSU Glocal Festival 2025 on 22–23 August 2025 at Central Nakhon Si Thammarat. The activity provided physical therapy assessments and treatments using physical therapy equipment, such as ultrasound and electrical stimulation, to relieve pain and promote mobility. It also offered advice on injuries related to work and daily activities.

In addition, efforts were made to establish integrated partnerships to provide healthcare for people of all age groups. On 17 July 2025, the Faculty of Allied Health Sciences participated in a meeting with Tha Miram Subdistrict Municipality, Ban Nam Lueat Subdistrict Health Promoting Hospital, and a network of village health volunteers to develop health-related activities, area-based research, experiential learning opportunities for students, and proactive healthcare services at the subdistrict level.

5. National Partnerships

At the national level, Thaksin University recognizes the importance of addressing the shortage of medical personnel in Thailand. The University therefore held discussions with Krabi Hospital to develop cooperation in medical education and establish the hospital as a primary training site for future medical students to undertake clinical and community-based practice. This collaboration aims to address the demand for healthcare professionals in Southern Thailand.

In addition, the Cabinet approved the establishment of the Holistic Medical Center and Faculty of Medicine at Thaksin University's Phatthalung Campus to develop comprehensive healthcare services addressing physical, mental, and social well-being, while meeting the medical and healthcare needs of the region.

Furthermore, Thaksin University received research funding from the Science, Research and Innovation Promotion Fund (SRI Fund) for several research programs, including health and functional foods, ageing, and herbal

cosmeceuticals. These research areas have the potential to further advance knowledge and innovation in health and healthcare.

6. International Partnerships

At the international level, Thaksin University recognized the importance of advancing healthcare through international knowledge exchange in holistic medicine. From 17 to 22 May 2025, University executives and medical experts undertook a study visit to the Tzu Chi Foundation in Taiwan to learn about hospital management and holistic medical center operations. The visit also focused on integrating modern medicine, traditional Thai medicine, alternative medicine, and local wisdom. The knowledge gained from this visit was intended to inform the development of the Holistic Medical Center at Thaksin University's Phatthalung Campus.
